Best Biotech Websites in the World

- [4Biotech](#) -- a guide to biotechnology from 4anything.com. This site provides some of the best links to biotechnology-related sites in the world (Updated 8/20/00).
- [Access Excellence](#)  provides a broad range of interesting pages for those interested in biology and biotechnology. It is part of the National Health Museum as of August 2, 1999 (Updated 9/15/99).
- [AgBiotechNet](#) provides a broad resource for agriculturally-related issues (Updated 5/13/01).
- [BEST - Biochemistry Easy Search Tool Engineering, Inc.](#)  is an important list of biochemistry related links. The site is maintained by the [Worthington Software Engineering, Inc.](#) (Updated 8/24/99)
- [BioABACUS](#)  is a searchable database of abbreviations and acronyms in Biotechnology. The data provided include the name of the term, its meaning, the category in which it is mostly used and, when available, a link in which additional information for the term can be found (Updated 5/26/99).
- [biochemist.com](#)  1.To serve as a site where visitors can learn and ask questions about Biochemistry. 2.To provide biochemists with links to reference material found on the Internet. 3.It will provide an on-line message board where individuals can post questions or comments about ongoing research 4.There will also be an on-line chat board where individuals from around the world can chat live (Updated 8/20/00).
- [BioChemNet \(very cool site\)](#)  a guide to the best biology and chemistry educational resources on the net (Updated 10/17/99).
- [bio.com \(BIO ONLINE\)](#)  (**no membership required; some parts of site are proprietary**) is the most comprehensive site for biotechnology-related information and services on the Internet. BIO ONLINE provides information resources from biotechnology companies, biotechnology centers, universities and other research and academic institutions, industry suppliers, government agencies, and non-profit special interest groups to the biotechnology community via the World-wide Web (Updated 5/26/99).
- [bioethics.net \(free membership\)](#) this site provides a broad range of resources for those interested in bioethics (Updated 9/23/99).
- [BioMedGate - portal to life](#)  **New** BioMedGate is a specialized biomedical web directory and search engine, also provides biomedical news coverage and free literature alerting (Updated 5/13/01).
- [biomednet.com](#)  (**free membership; some parts are proprietary**) contains over 170 biological and medical journals, with abstracts and some articles available for free. They also have an evaluated medline, jobline, and an extensive list of links (Updated 7/17/99).
- [Biophysics Textbook online \(BTOL\)](#)  **New** provides a wide range of information from spectroscopy to thermodynamics. It is the best online tutorial on biophysics and it is sponsored by the [Biophysical Society](#). (Updated 10/03/01).
- [BioScience Links](#)  (**no membership required; very cool!**) BioScience Links is both the search engine as well as the biology link database developed specially for the researchers involved in biological studies (Updated 10/17/99).
- [biospace.com](#)  (**no membership required**) this site provides a very interesting glossary and what is happening in biotechnology industry. It also has a useful guide for jobs in the biotechnology field (Updated 5/26/99).
- [biotech, Indiana University](#) (**no membership required**) is a hybrid biology/chemistry educational resource and research tool on the World Wide Web. BioTech is intended to be a learning tool that will attract students and enrich the public's knowledge of biology issues in the world today. It is

- 

genamics.com (**very cool site!**) provides several useful areas such as, [SoftwareSeek](#), [JournalSeek](#), [GenomeSeek](#), and [BookSeek](#) (Updated 9/23/99).
- 
[Genbrain Biosystem Network](#)   Bioinformatics for Transgenics, Bionic Engineering, Genetic Science, Nanotechnology, Biocomputing and exploring on genomic intelligence and artificial biosystems (Updated 8/20/00).
- 
[LabOnWeb life science research engine](#)   (**membership required**) LabOnWeb is a collection of online lab protocols and life science research tools. LabOnWeb is different from other online search services in the scope of its analysis, its proprietary data and tools that it uses to enhance gene discovery and in its delivery of information. LabOnWeb protocols provide "big picture" results, giving researchers the information they need to perform more effective, efficient life science research (Updated 3/4/00).
- 
[LabVelocity](#)   was founded by scientists to simplify information retrieval in the unique and complex life sciences' market. By providing customizable services, we will become an indispensable daily resource for maximizing scientists' productivity. In addition to advanced product identification tools and comparison tables, LabVelocity supplies scientific protocols, commonly used reference materials, pathway diagrams, and buffer recipe and unit conversion calculators. Our customizable Literature searches and scientific News services will keep scientists current in a constantly changing research world (Updated 12/11/00).
- 
[MBS - Molecular Biology Shortcuts](#)  (**no membership required**) provides a broad panorama of different links and it also provides a useful search engine (Updated 6/16/99).
- 
[mednav.com](#)  (**membership required for access to some parts of the website**) provides links to a broad range of issues related to medicine and the medical community.
- 
[national biotechnology information \(NBIF\)](#)  (**no membership required**) facility provides a broad range of educational and research links. Also, test your skills by playing "Outbreak!" (Updated 5/27/99)
- 
[Pasteur Institute's list of guides, tutorials, and documents](#)  (**no membership required**) related to molecular biology at the [Pasteur Institute](#) (Updated 1/28/00)
- 
[Protocol Online](#)  (**no membership required; very cool site**) Directory of protocols in cell biology, molecular biology and immunology (Updated 8/25/99).
- 
[RefScout®](#)  (**Free subscription**) is a weekly, scientific reference mailing service. Would you like to be updated every week on the emerging literature in your field? Simply enter key words, and RefScout® does the work for you! RefScout® will screen databases covering life and medical sciences for the key words or the combination of key words you specified and will automatically update you with any abstract that has come up during the last seven days - **every week and for free!** (Updated 6/16/2).
- 
[sciweb.com](#)  (**no membership required**) this website provides a broad range of services from a biocareer center to more business related stuff in the biotechnology arena (Updated 5/27/99)
- 
[WHAT IF \(web interface\)](#) (**platform independent; Free**) provides nearly 2000 options in fields as diverse as homology modeling, drug docking, electrostatics calculations, structure validation and visualisation (Updated 6/9/99).
- 
[The World-Wide Web Virtual Library: Biotechnology](#)  (**no membership required**) This directory contains over 1000 URLs specific to biotechnology, pharmaceutical development and related fields. It places emphasis on product development and the delivery of products and services. This is a very cool site with many useful links to a wide variety of sources (Updated 6/13/99).
